

Capstone Presentation Preparation Worksheet

Presentation Requirements

- Length: **5–10 minutes max**
 - You must **run your program live**
 - PowerPoint is **optional**
 - Focus on your **developer journey**, not your code
-

1. Live Demo Plan (Start Here)

You should begin your presentation by running your program. Show us the program meets the requirements.

2. Your Developer Journey (MOST IMPORTANT SECTION)

Your presentation **DOES NOT** have to cover all these topics. This is to get you to brainstorm. Pick the topics that are most meaningful to you on your coding journey.

Starting Point

- What did you know before this project?
- What felt confusing at the beginning?

Challenges You Faced

- What was the hardest part of this project?
- What bugs or issues did you run into?
- How did you feel when things didn't work?

How You Solved Problems

- How did you figure things out?
 - Trial and error?
 - Debugging?

- Looking things up?
- Asking for help?

Breakthrough Moments

- When did something finally “click” for you?
 - What concept do you understand now that you didn’t before?
-

4. What You Learned

Be specific:

- One technical thing you learned (example: loops, methods, file reading, etc.)
 - One problem-solving skill you improved
 - One thing you would do better next time
-

5. If You Had More Time

- What would you improve or add?
 - What features are missing?
 - What would make your app more useful or user-friendly?
-

6. Reflection (Short but honest)

- What are you most proud of?
 - What was frustrating?
 - Do you feel more confident as a developer now? Why or why not?
-

7. Presentation Plan (Outline your flow)

Write your plan here:

1. Demo program

2. Explain what it does
3. Talk about challenges
4. Talk about what you learned
5. Wrap up

Final Reminder

- Do NOT focus on showing code
- DO focus on your growth and experience
- Practice your demo so it runs smoothly
- Keep it within time
